**FROM TEXTILE
WASTE..**

TO A RECYCLED VENEER

Reznign® is a specialist in recycled materials.

By using recycled materials made of textile residues and bio-based resources, we aim for creators to bridge the gap between contemporary design and environmental consciousness.

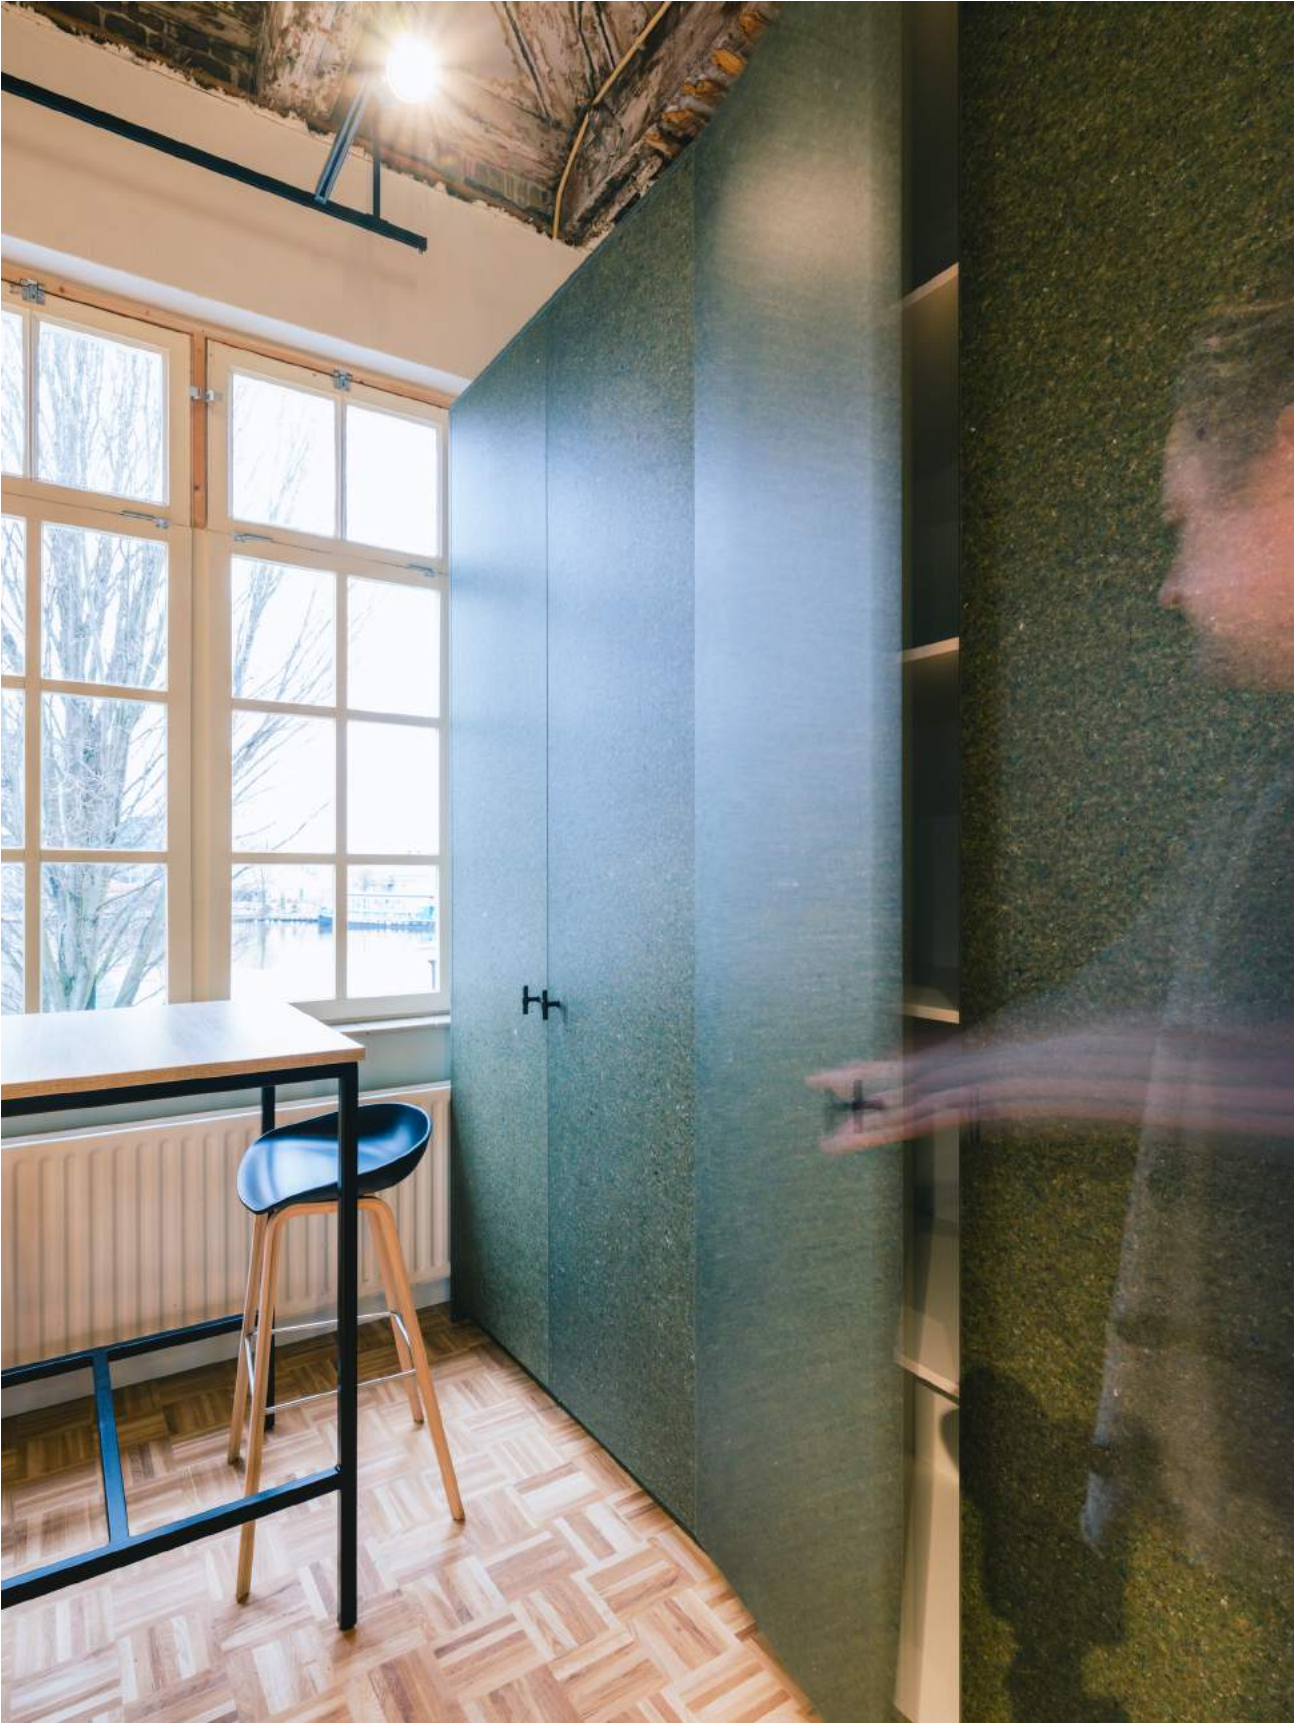

FOR A BETTER TOMMORROW

With Rezipn, we believe to make an impact by inspiring the world to create beautiful designs made of waste materials.

In order for creating a better tomorrow with zero textile waste, but also to inspire creators to design high-end products made of low-valued materials in order to have a positive impact on the interior as well as the fashion industry.

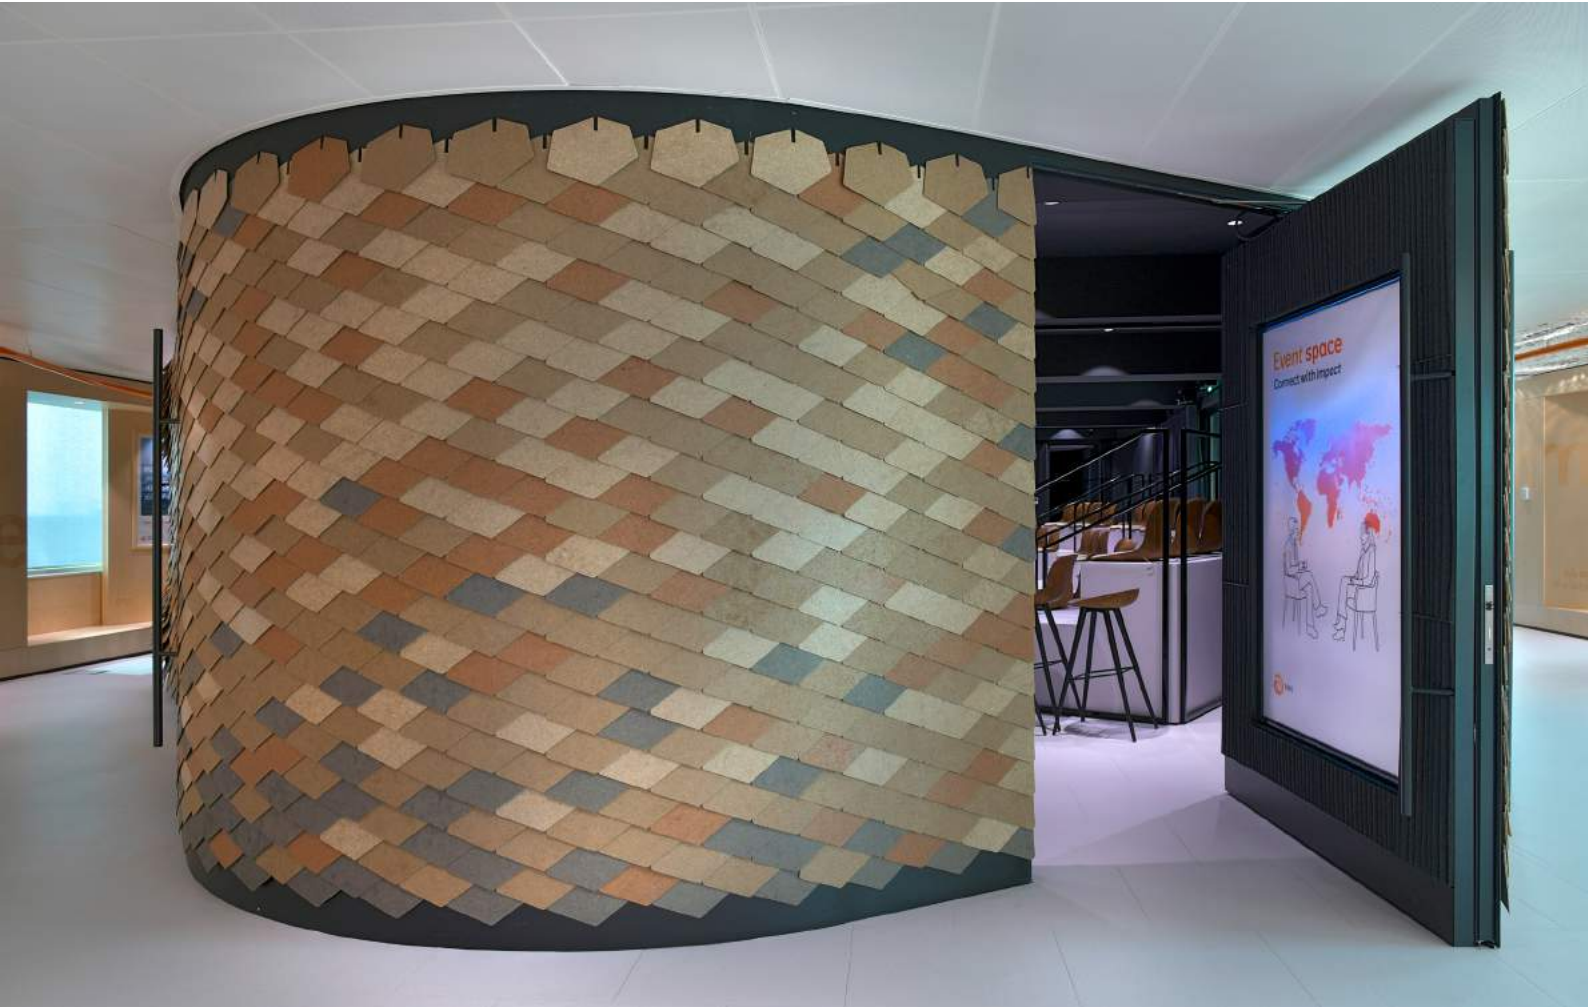

Cabinet in Army

**HONEST
MATERIALS..**

'Scales Wall'. 16.000 scales of Flax Veneer in custom colours.

Nationale Nederlanden-The Hague

..TIMELESS DESIGNS

The materials are made of waste such as textile residues or biobased resources, such as flax and jute. The post-consumer jeans, suits, army, flax, and jute are being processed with a biodegradable binder. Therefore all the materials are 100% recyclable. Not to mention that the flax is even biodegradable. Recycled materials made of low-valued products in order to create high-value designs that will last forever.
